

Feifei Rong

AI Engineer · AI Coding & Cross-Stack Delivery · 0-to-1 AI Features · Workflow Orchestration

+86 139 5162 1874 · feifei.rong2@gmail.com · linkedin.com/in/feifei-rong · Portfolio · Pudong, Shanghai

Focus: AI Engineering · AI Applications / Workflow Platforms · AI-Assisted Cross-Stack Delivery | **Based in:** Shanghai

Profile & Core Capabilities

Profile

- **0-to-1 startup delivery:** In AI startups with broad ownership, turn ambiguous customer and business needs into plans, prototypes, cross-stack implementation, deployment, and shipped results.
- **AI-assisted cross-stack engineering:** Python is my strongest language; use Claude Code / Codex in TypeScript projects and own task breakdown, review, debugging, testing, integration, and release validation.
- **Cross-platform & international:** Resolve AI-workflow deployment differences; worked full-time in London and am comfortable with the communication style and broad ownership of international startup teams.

Core Capabilities

AI Coding Claude Code · Codex · Task breakdown · Context organization · Review of AI-generated changes · Testing · Release validation

Workflow & Integration REST / model APIs · Third-party services · Dependency-driven orchestration (DAG) · File and media processing

Python & Search Python · Flask · Vector retrieval · Semantic search · Crawlers · FFmpeg

Deployment Docker / Cog · ComfyUI · Custom Nodes · RunPod / Replicate / AutoDL · AWS / FC / OSS

Frontend Prototype Hand-coded HTML / JavaScript semantic-search demos

Experience

AI Engineer · 河出图（上海）智能科技有限公司 (Dynampix) · Shanghai, China Dec 2024 - Present

- **AI Short-Video Workflow Platform for Law Firms** Apr 2026 - Present
AI-assisted stack: TypeScript · Vue 3 · Fastify · PostgreSQL · SSE · Alibaba Cloud FC / OSS
 - Participate across the full delivery lifecycle and lead the initial design of a node-based workflow for batch talking-head video production, decomposing scripting, TTS, avatars, B-roll, captions, and video services into composable nodes executed by dependency order.
 - Maintain the workflow-node library and main platform app; use Claude Code / Codex for task breakdown, context organization, and most implementation work, while owning review, debugging, testing, integration, and release validation.
 - Own deployment architecture and platform selection for media-processing services, defining each module's deployment model, hosting platform, invocation method, and media-asset flow, and driving implementation and validation of the FC / OSS solution.
- **ComfyUI Workflow Productionization & Cross-Platform Runtime** Dec 2024 - Present
Python · ComfyUI · Docker / Cog · RunPod · Replicate · AutoDL · AWS
 - Package the same ComfyUI workflow as a deployable, callable service across RunPod, Replicate, AutoDL, bare-metal hosts, and AWS.
 - Resolve differences in platform endpoints, Custom Nodes, model assets, Python / CUDA dependencies, container startup, and runtime efficiency, improving deployment stability across environments.

AI Consultant · Part-time / Remote · FADEL Nov 2021 - Jan 2025

- **Enterprise Media Platform & Video Retrieval:** After FADEL acquired Image Data Systems, maintained Python video-retrieval services and multimedia pipelines; integrated researcher-delivered models into Python application PoCs and Dockerized the services.
- **E-commerce Media Collection & Ingestion:** Built image / video crawlers and ingested assets into the enterprise media platform; collaborated in English across time zones with a computer-vision advisor and R&D team members in Beirut and France.

AI Engineer · Image Data Systems (UK) Ltd · London, UK Jan 2018 - Oct 2021

- **AI Visual Search:** Worked with a computer-vision advisor to integrate facial recognition, pose estimation, and image clustering into a Python visual-search platform; joined customer meetings and requirements discovery.
- **Semantic-Search Prototype:** Built Flask APIs and hand-coded HTML / JavaScript interfaces for vector-backed search demos and AI tooling PoCs; deployed related Python services as Dockerized microservices.

Earlier Experience

ChinaSoft International, Nanjing · Software Test Engineer
IoT / networking performance testing and Linux troubleshooting · Oct 2015 - Aug 2016

Zhejiang Yizhou, Beijing R&D Center · Embedded Software Engineer
Educational robotics prototyping · Dec 2014 - Sep 2015

Education

University of Bristol · MSc, Robotics
2016 - 2017

University of Southampton · PGDip, Computer Software Engineering
2013 - 2014

Institute of Technology, Tallaght · BEng, Electrical & Electronics Engineering
3+1 Programme · 2012 - 2013

Nanjing University of Technology · BEng, Electronic Information Engineering
3+1 Programme · 2009 - 2013
