

Feifei Rong

AI Engineer · Generative AI / AIGC Productization · AI Workflow Platforms

feifei.rong2@gmail.com · <https://www.linkedin.com/in/feifei-rong/> · Shanghai, China

SUMMARY

Software engineer since 2014, focused on AI application delivery and production integration since 2018; Python is my primary and strongest language. Experienced in deploying ComfyUI workflows, integrating GPU-backed services across cloud environments, and building reliable AI workflow systems.

I work with model researchers to turn research outputs into reliable services, focusing on engineering integration, deployment, validation, and service reliability.

Full-time work experience in London and extensive collaboration in English with UK and globally distributed teams.

SKILLS

Generative AI Delivery
ComfyUI deployment and workflow integration · Gradio PoCs and demos · SD / SDXL / Flux / ControlNet / LoRA workloads

Backend & Workflow
Python · TypeScript / Node.js · Fastify · PostgreSQL · Django · Flask · REST APIs

Cloud & Deployment
Docker · AWS (EC2 / Lambda / S3) · RunPod · Replicate · AutoDL · Bare Metal · Alibaba Cloud FC / OSS

Vision & Media
OpenCV · FFmpeg · visual search · production integration of computer-vision and multimedia models

EDUCATION

University of Bristol · MSc, Robotics · 2016–2017
University of Southampton · Postgraduate Diploma, Computer Software Engineering · 2013–2014
Institute of Technology, Tallaght · BEng, Electrical & Electronics Engineering · 2012–2013
Nanjing University of Technology · BEng, Electronic Information Engineering · 2009–2013

EXPERIENCE

Dynampix · AI Engineer
Dec 2024 – Present · Shanghai, China

- Deploy Dockerized ComfyUI workflows and integrate GPU-backed workloads across multiple cloud and bare-metal environments.
- Build modules for an AI short-video workflow platform, owning requirements analysis, task decomposition, code review, testing, integration, and production reliability.
- Govern self-contained dependencies and validation gates; design checkpoint, task-reuse, and uncertain-result safeguards for paid media operations.
- Maintain a unified local / remote FFmpeg runner and remote execution support, with layered timeouts, body-idle watchdogs, and structured contextual logging.

FADEL · AI Consultant · Part-time / Remote
Nov 2021 – Jan 2025

- Evaluated engineering options, prepared data and interfaces, and integrated researcher-developed models into full-stack AWS PoCs.
- Maintained Python / Django / Docker / AWS image-and-video retrieval services and automated multimedia ingestion pipelines.
- Advised an English-speaking R&D team on architecture, technical standards, mentoring, and cross-time-zone onboarding.

Image Data Systems (UK) Ltd · AI Engineer
Jan 2018 – Oct 2021 · London, UK

- Developed Python / Django retrieval services and multimedia ingestion pipelines for a B2B visual-search platform.
- Integrated facial-recognition, pose-estimation, and image-clustering models into production workflows.
- Led a containerized annotation-and-training tooling PoC and automated AWS AMI builds with Packer.

Earlier Experience
ChinaSoft International · Software Test Engineer · IoT / networking performance testing and Linux troubleshooting
Zhejiang Yizhou Electronic Technology · Embedded Software Engineer · educational robotics prototyping
